## Welcome to the 2.0 - Revolution: Wall Street Memes 2.0

Prepare for liftoff as we introduce you to the most electrifying crypto 2.0 project of our time. This one just might go down in the history books as the first 2.0 Token launch before the original, it's meme magic! Wall Street Memes (WSM2.0) has risen from WSM, from the ashes of the legendary GameStop saga, where a band of fearless individual investors stood tall against the mighty Wall Street giants. Now, WSM says "we're here to rewrite the rules of finance with one powerful weapon: MEMES"! And now, WSM2.0 is here to correct the misdeeds of WSM, let's call a spade a spade... we're none of that, we're not tokenizing anything, we're simply a meme coin with an improved tokenomics that will allow you, the little guy, even greater gains.

Get your WSM2.0 now, and hey, if you want to turn your gains around into WSM later for long term growth, or just hang around here and see if we can accomplish what Pepe and Doge did... stick with us, make memecoins great again by tapping into the greater WSM community (I will add, that the latest news about Pepe is not that great)!

Our mission is clear: to create a cool meme coin, correct the tokenomics of WSM to allow for greater gains, and cut through all the crap! What we won't do... "empower the everyday investor and disrupt the traditional financial landscape"... we're not here to empower anybody we're just here to have fun and make a great memecoin with a great community. We believe WSM didn't quite get the memecoin thing right, or the tokenomics right, so we exist solely to correct that, allowing for greater gains that are far less limited than WSM, starting with a \$30M MC; at that valuation, quite realistically, there is limited upside. We will take full advantage of the WSM marketing machine (50% of tokens allocated to marketing), leveraging that to push WSM2.0 to Pepe like gains. Not saying you're going to turn every \$27 into a million, but we do have lofty goals!

We also believe that memes have the extraordinary power to unite, inspire, and allow us to just have fun with crypto and maybe make a few \$\$.

# WHITEPAPER

Keeping in mind, WSM2.0 is a meme coin with no intrinsic value or expectation of financial return.

There is no formal team or roadmap (although we kind do have some plans), the coin is completely useless and for entertainment purposes only, it's not going to empower you, just have fun with it! Unlike WSM contends, we're not part of any movement that puts the control back into the hands of the people, where it rightfully belongs, we're a bloody meme coin!

Like Pepe says, the dogs have had their day, you too Pepe, move over, it's time for WSM2.0, a meme play on the whole WSM thing (without all the crap) and the Wall Street Bets movement. We're building a damn meme coin; we're not building an ROI machine, further forging an unstoppable community (seriously WSM)? So, WSM2.0 (ironically first, after an unprecedented WSM presale of how many months) will launch with a bang before WSM, and aim for unprecedented growth and market capitalization, times 2!... Oh yeah keeping in mind that no intrinsic value or financial return stuff... it's a meme coin... sure we'll throw in a little WSM satire too!

This journey isn't just about financial gains – after all, we are nothing more than a meme token, with no intrinsic value, that's all on you, you can build value just by being here and supporting the project... No, no no... we're not about reshaping the world of finance (WSM again, empowering, redefining, reshaping...blah, blah, blah... ) with laughter, unity, and the indomitable strength of memes, and maybe making some life-changing gains in the process... that financial thing again, remember? WSM says they are... “rewriting the narrative of Wall Street, infusing it with the power of the internet's triumph over rampant capitalism... The era of ‘Greed is good’ was version 1.0, and makes room for a new era of financial empowerment for all”. WOW!!! Yeah, just WOW!!! we're just here to have fun, and you know, make memecoins great again, right Pepe?

So, strap into the rocketship, boosted by WSM2.0, as we jump on the whole meme craze thing, and do our best to kick Pepe's ass, no offense man!. Anything's possible in crypto right?

# WHITEPAPER

WSM2.0 with an enhanced tokenomics designed for you, leveraging the brand power and community of Wall Street Memes (WSM) we are leading the way, literally launching 2.0 ahead of the original WSM! There's no limit to what we can achieve together. Yada yada yada, great again!

**The 2.0 revolution continues!**

## ROADMAP

### 3 Phases: We Meme2.0 Business

Together, we'll show the world what WSM2.0 can do for the meme coins, and we have a not so clear roadmap to guide us on this journey.

**Phase 1: Foundation** will focus on developing a secure smart contract with improved tokenomics, and the presale/claim/sale website cutting out all the crap, we're a meme coin, that's it!

**Phase 2: Launch and HODL** will witness the official liftoff of the \$WSM2.0 token, listings on CG, CMC, DEX (Uniswap) and CEXs, and take full advantage of WSM awareness and marketing campaigns, we may also launch a WSM2.0 NFT Collection. We'll have a presale but it won't last 6 months, we promise on that one, just a week for the presale, no soft cap or hard cap, then we'll launch on the DEX, none of this keeping it all secret until some random day months away, we'll be open and honest and let you know what's happening.

# WHITEPAPER

**Phase 3: Build Community and Grow** will look at additional functionality to benefit our community, like staking, mining pools, a custom meme DEX, but no guarantees on any of this, it really depends on you... also, our lofty goal is to achieve a \$100M market capitalization, and secure listings on top-tier CEX's.

## PHASE 1: FOUNDATION

- **Smart Contract Development:** Secure and audited smart contract for \$WSM2.0 token to ensure transparency and trust with improved tokenomics. Contract will be renounced and audited.
- **Community Building:** Leverage Twitter, Telegram, Discord, Instagram of WSM with our own socials, TG and X(Formerly Twitter) - Get ready for the hype train with a strong and engaged WSM2.0.
- **Branding and Marketing:** The Branding and Marketing is done, we'll leverage the spread of the word about Wall Street Memes with their comprehensive marketing campaign backed by professional marketers. Let's go viral too!

- **Token Listings:** Launch \$WSM2.0 token on popular DEXs (Uniswap) with ample liquidity and accessibility. Trade with ease.
- **Exchange Listings:** Level up our trading game with listings on established CEXs. Reach even more people, if that's possible, who can not know about WSM by now, target is 100,000 holders.
- **Awareness Campaigns:** We'll leave this to WSM to take the Wall Street Memes revolution mainstream. Media, influencers, and popular platforms, we'll be there too! Forget to the Moon... let's go to Mars with Elon!

We'll let Vitalik know what's going on as well, since he has said that his most successful investment was a meme coin, DOGE... On a podcast with Lex Friedman, Buterik stated... "That was the best investment I ever made... my interest is financial – this is a for profit play – but it's also fun".

As we grow, we'll look to adding some more fun stuff, like staking, a mining platform, NFT minting, and our very own MemeSwap DEX!
- **Tier 1 CEX Listings:** Get listed on top-tier CEXs. Boost liquidity, accessibility, and reach for all WSM2.0 holders!

## Disclaimer: Not Doxed

First and foremost, honesty and integrity don't seem to be a big thing in the crypto space, but it is important to us.

We are not doxed, that doesn't mean that we're not here for you, it just means we want to remain anonymous. The Team has extensive Blockchain experience; all contracts will be validated, and the WSM2.0 contract will be renounced to eliminate any possibility of a rug pull. Note that we are here with you for the long term... yes, you're right, we're JUST a meme coin, but we do have big plans to add some real utility in the future, and grow this project to something really cool over time, while hopefully creating a great community of loyal holders, and adding value to your holdings.

## Disclaimer: Not Financial Advice

Hold onto your moon and mars boots, fellow members! Before we embark on this wild ride with Wall Street Memes new and improved true memecoin (WSM2.0), let's take a moment to remember that the cryptocurrency market can be as volatile as a bull in a china shop. While we're all about spreading fun, laughter, unity, community, and the strength of memes, it's essential to acknowledge the risks involved.

First and foremost, please remember that WSM2.0 is not your financial advisor. We can't guarantee astronomical gains or predict the future of the market. Investing in cryptocurrencies is like riding a rollercoaster - thrilling, unpredictable, and sometimes stomach-churning. Only invest what you're comfortable with losing, because, hey, memes may be powerful, but they're not a get-rich-quick scheme.

Furthermore, the crypto space can be a breeding ground for scammers and fraudsters lurking in the shadows. Watch out for impersonators, rugpulls, and suspicious schemes claiming to be associated with WSM2.0. Always double-check official channels and resist the temptation to fall for fake promises. The sad reality of the crypto space is that the scammers are relentless, tech savvy and most would happily steal their grandmother's last nickel without any remorse whatsoever, so be super careful and diligent. Above all, never give out your wallet secret phrase, nobody but a scammer will ask you for that. That is yours and yours alone, the instant you share it, your funds are gone, no question, and you'll never get them back.

Keep your meme shields up and stay informed about the latest updates and developments.

In summary, Wall Street Memes 2.0 is just a memecoin, not any exhilarating project that aims to reshape the world of finance with the power of memes. However, just as memes can go viral or fade into oblivion, the value of cryptocurrencies can fluctuate wildly. So buckle up, do your own research, and join us on this incredible journey with caution, a sense of humour, and a keen eye for opportunity, enjoy the ride although no doubt, it'll be a bumpy one!
